

# Using the OODA Loop (Observe, Orient, Decide, Act) for Measurement & Analysis or “Measure Like a Fighter Pilot”

Joe Lindley  
Dallas, TX  
972-205-7281  
[Joe\\_H\\_Lindley@Raytheon.com](mailto:Joe_H_Lindley@Raytheon.com)

# Purpose

- Introduce the OODA Loop as an Enabler for Implementing Measurement and Analysis (MA)
- Scope
  - Project Level Measurement
  - Measurement Analyst/Practitioner perspective
  - Implementation Strategy
  - Lessons Learned

# Agenda

**John Boyd's OODA Loop**

**Rationale for its Use in MA**

**The OODA Loop for MA**

**Summation**

# The Legacy of Colonel John Boyd (USAF Ret)

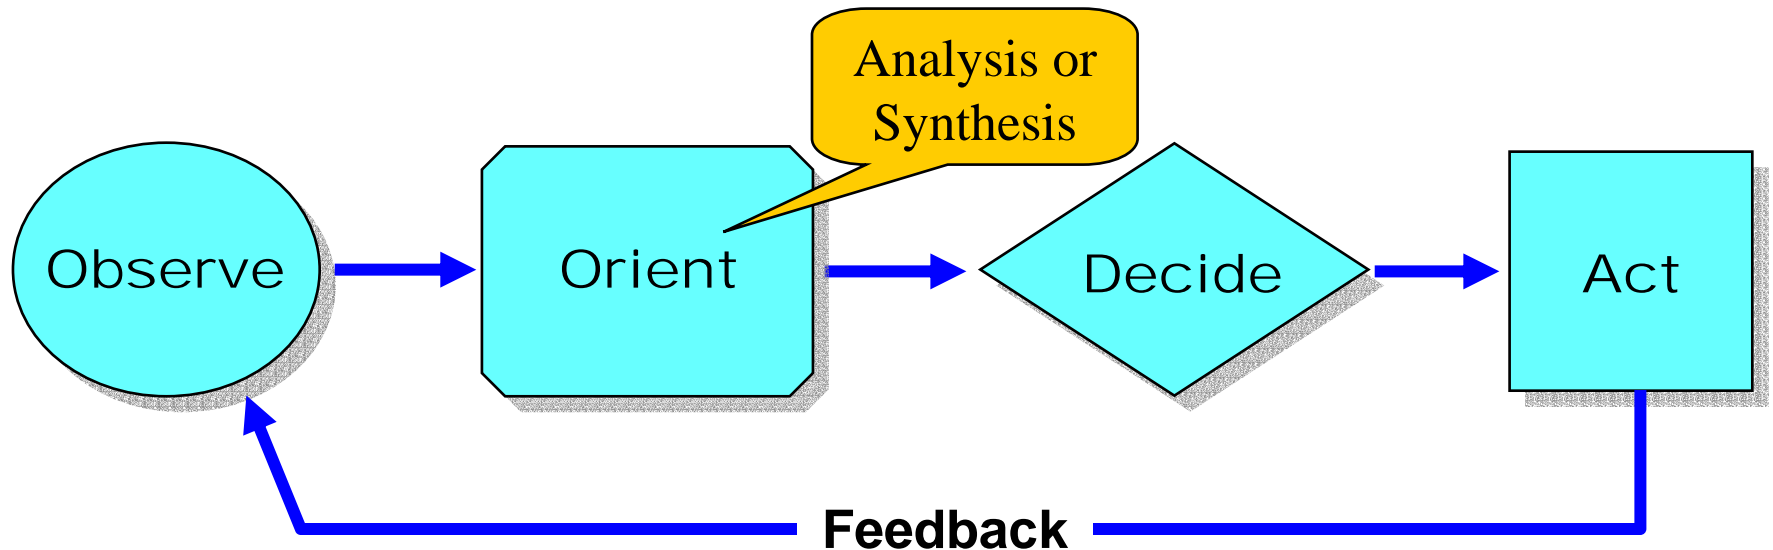

- “40-Second Boyd” (Korean War)
- “Mad Major” (F-15, F-16)
- “Genghis John”

## The OODA Loop & Maneuver Warfare

- U.S. Marine Corps
- Both Gulf Wars

# Boyd's OODA Loop

- Relates to all human behavior
- Goal: Successful interaction with other loops
- Get inside the opposing OODA Loop
  - Destructive: Air Combat, Warfare
  - Constructive: Engineering Process

# Agenda

**John Boyd's OODA Loop**

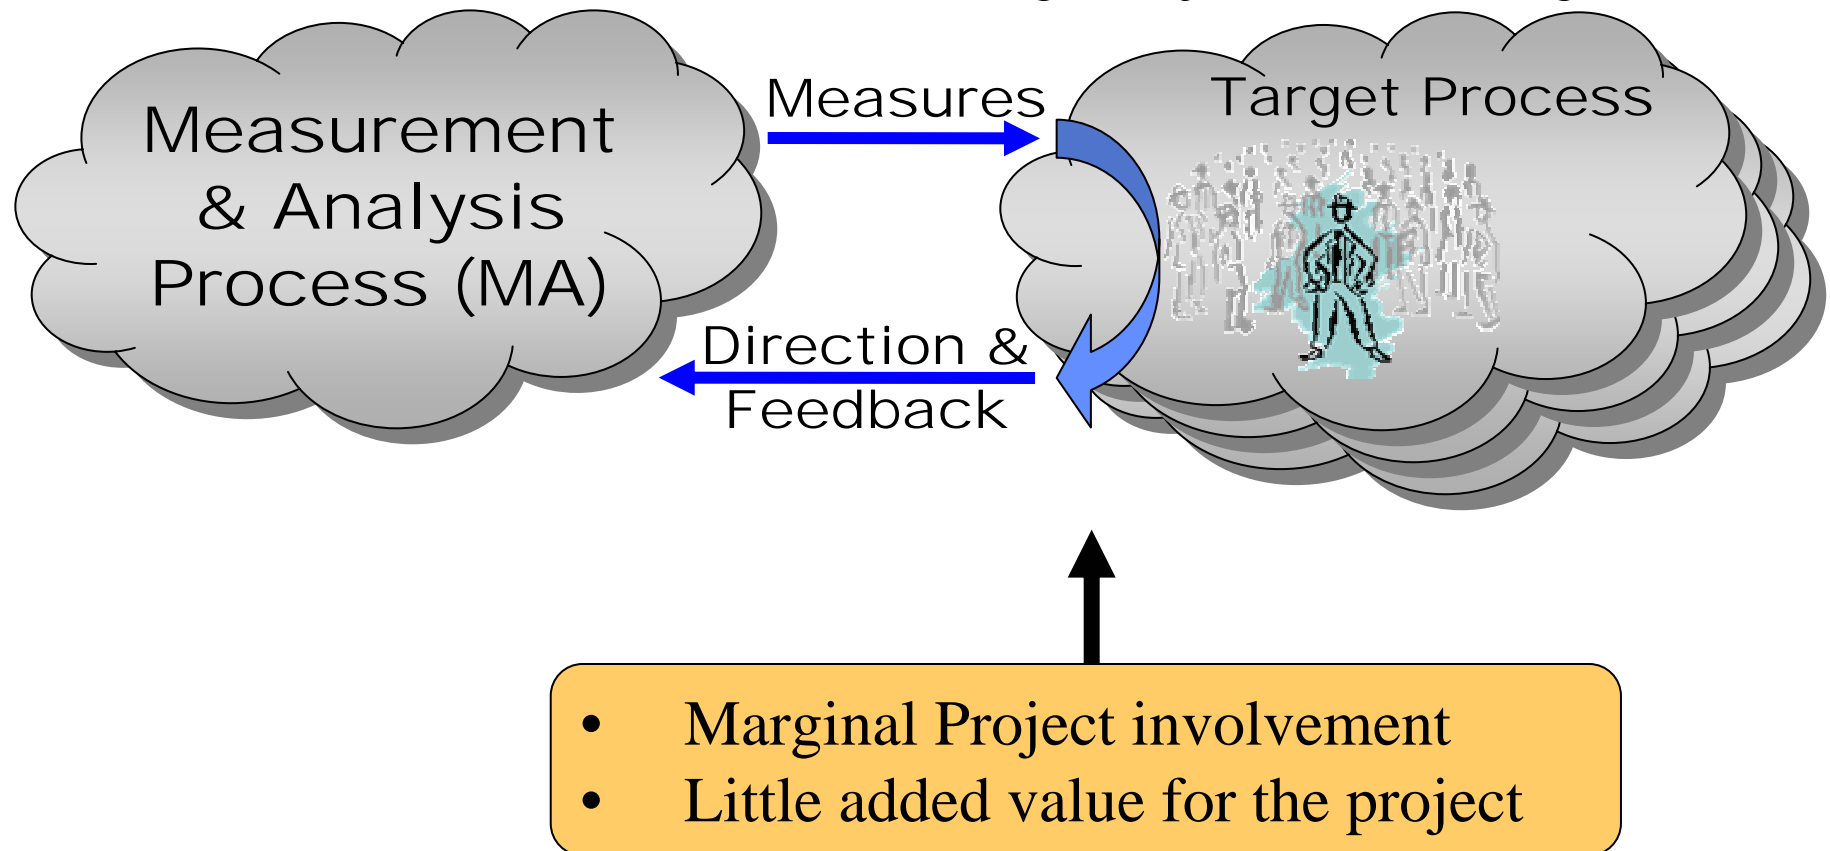

**Rationale for its Use in MA**

**The OODA Loop for MA**

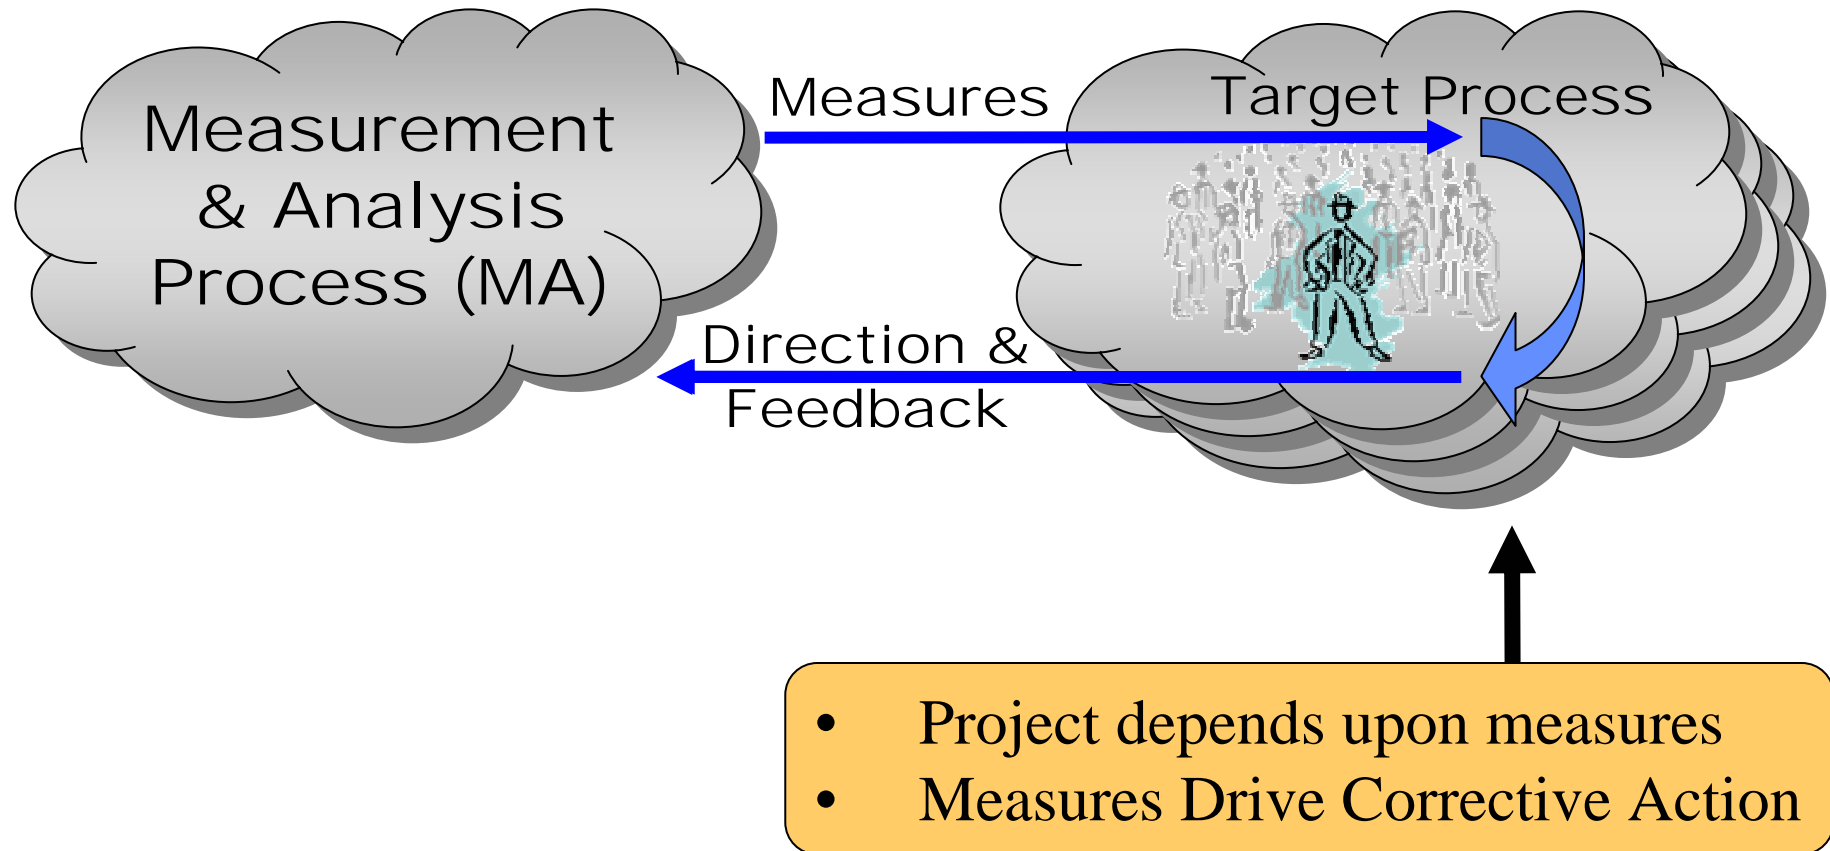

**Summation**

# Shallow Measurement Loops Fail

e.g. Project Monitoring & Control

# Deep Measurement Loops “Engage” and Succeed

# “Engage” by Getting Inside the Target OODA Loop

- Shifts focus to Target Process
- Provides an agile Framework for Action
- Drives Process Change and Corrective Action

# Agenda

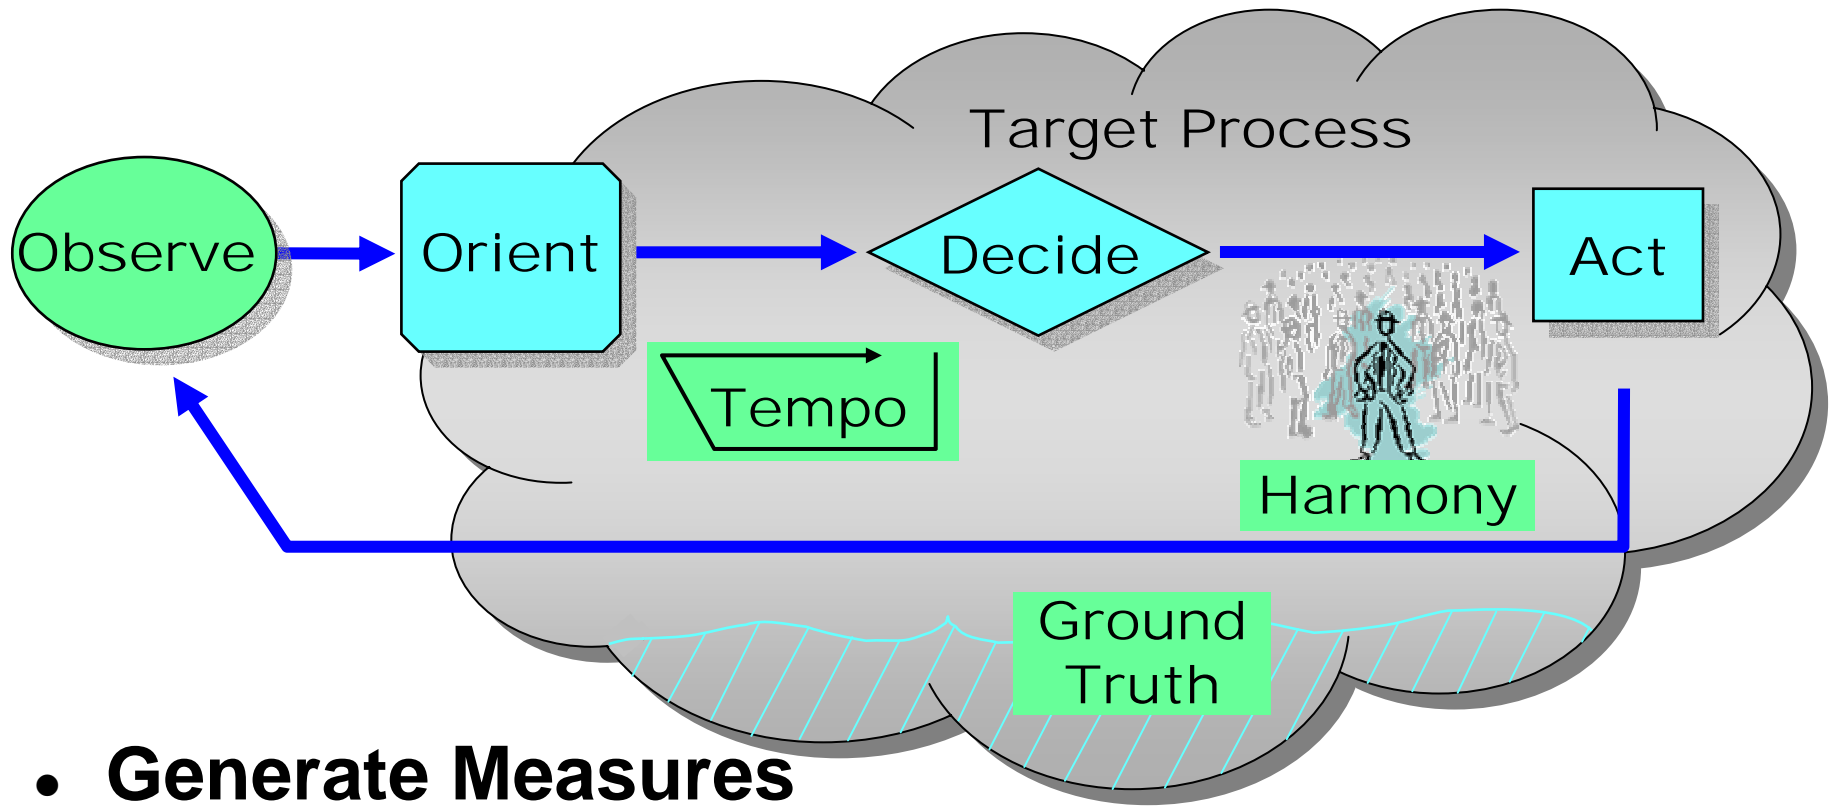

**John Boyd's OODA Loop**

**Rationale for its Use in MA**

**The OODA Loop for MA**

**Summation**

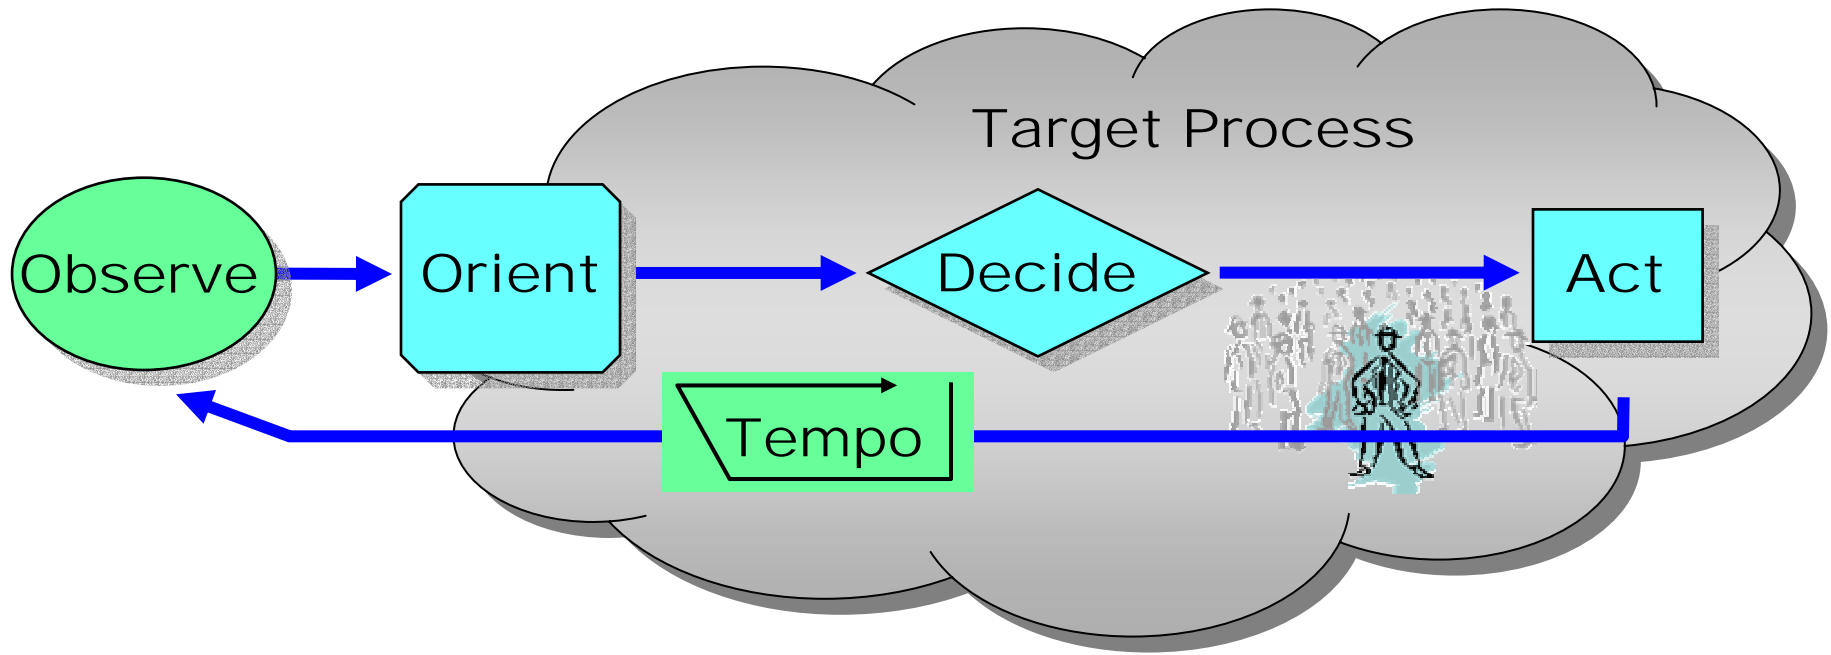

# Observe

- **Generate Measures**

- Establish Tempo
- Create Harmony with the Staff
- Establish Ground Truth

# Observe (Tempo)

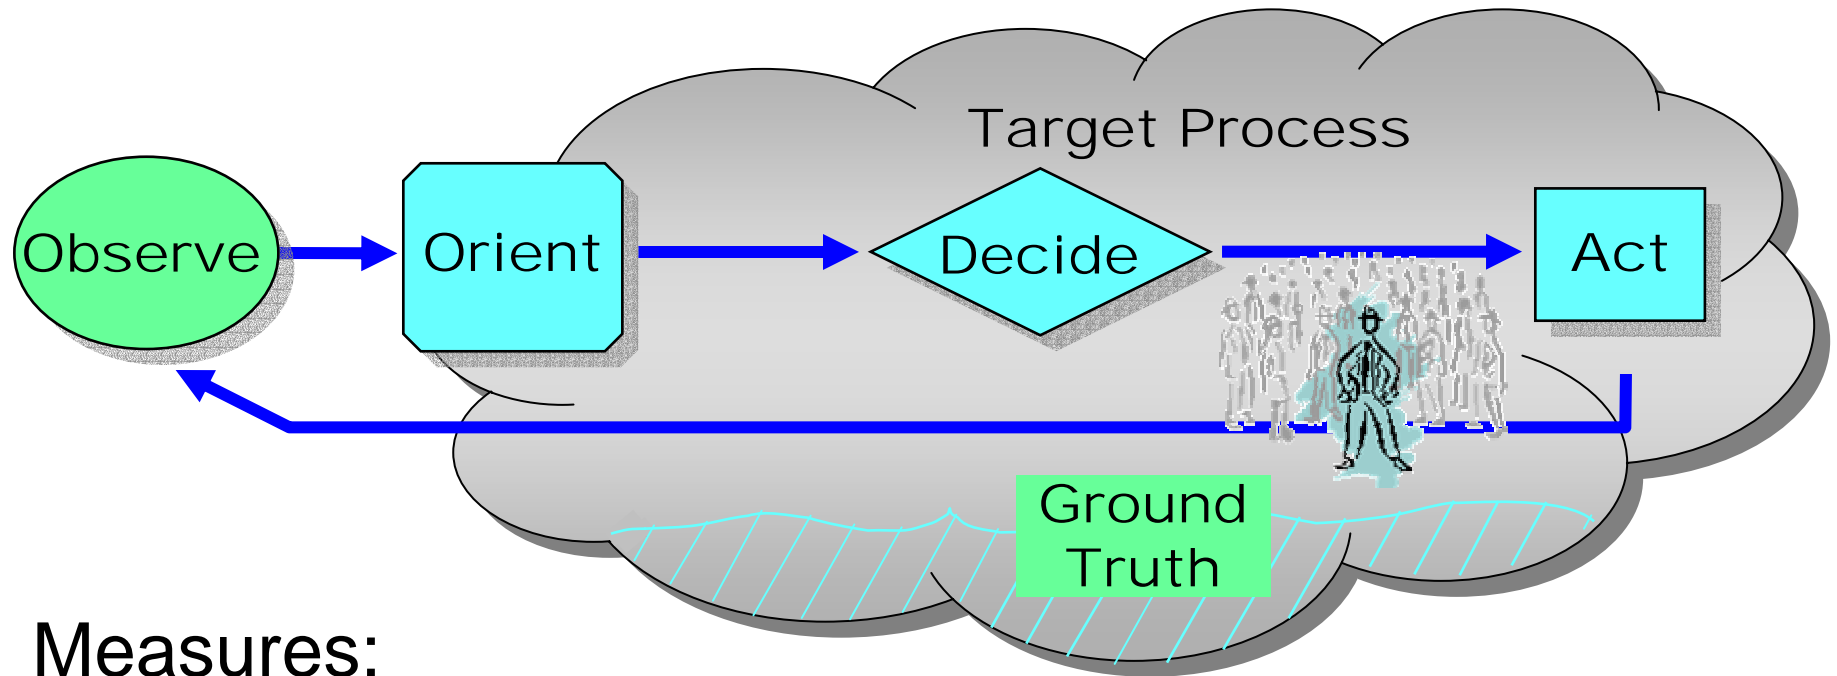

- Tempo: “Measurement Frequency & Timeliness”
- Very challenging
- Tools are critical

# Observe (Harmony)

- Sell measurement
- Establish trust and a common goal
- Avoid friction

# Observe (Ground Truth)

## Measures:

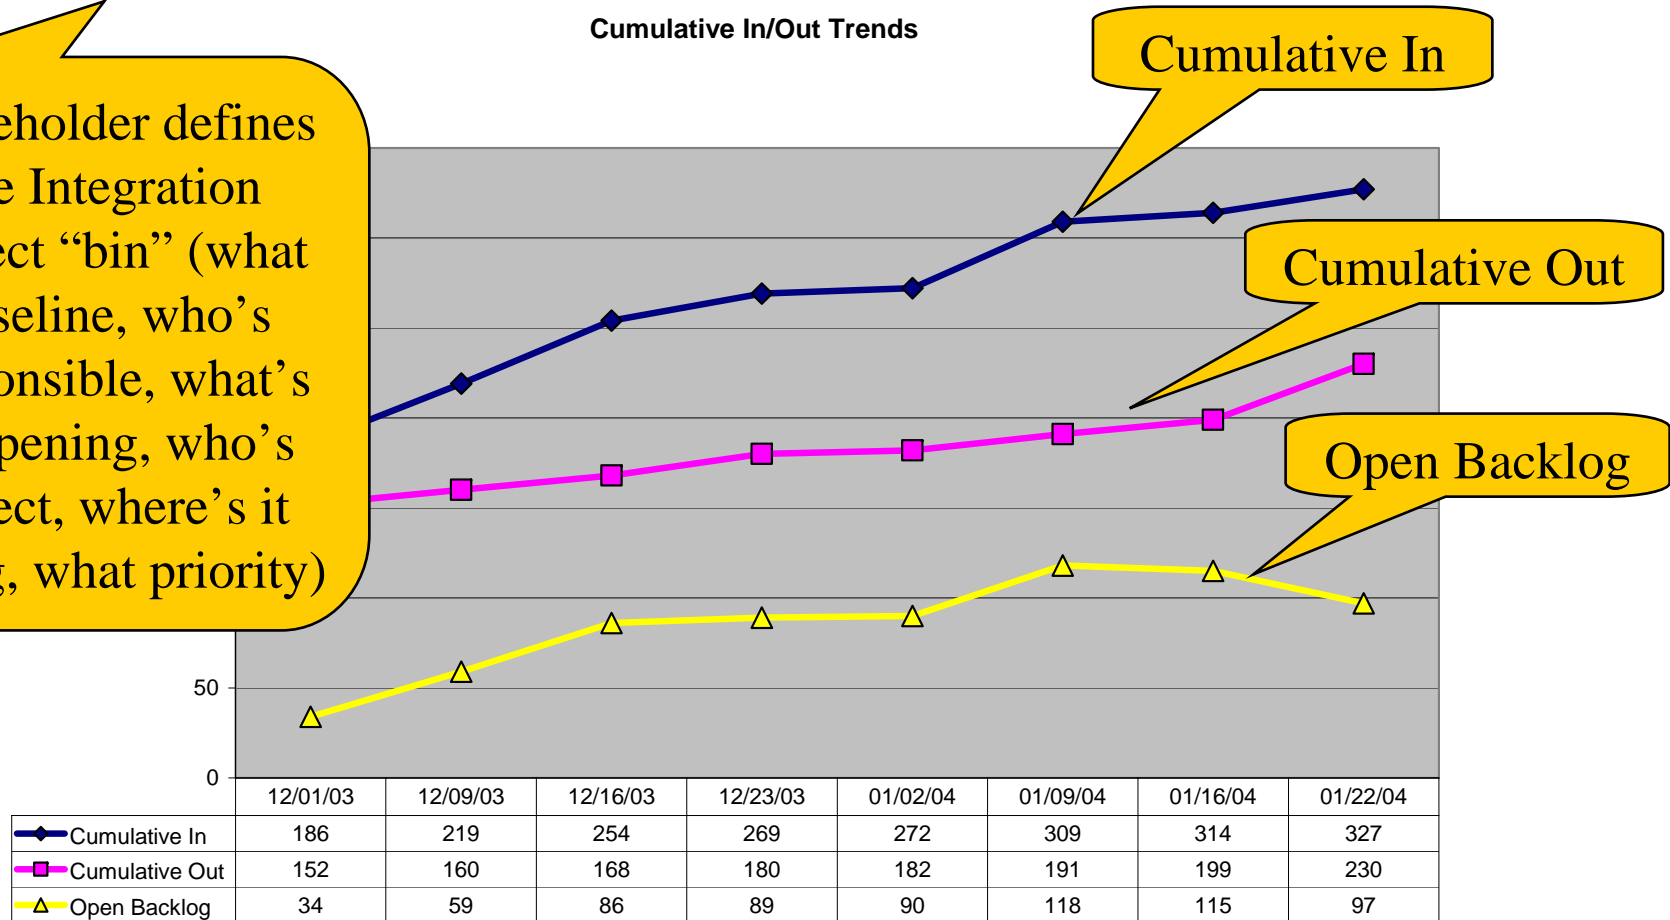

- Credible, Accessible, Flexible
- Finger-tip Feel
- Primary Reference

# Observe (Example Defect Chart)

Baseline V2.0 Responsible Org (All) Defect State Fixing Where Detected DXMod Build (All) Priority (All)

Cumulative In/Out Trends

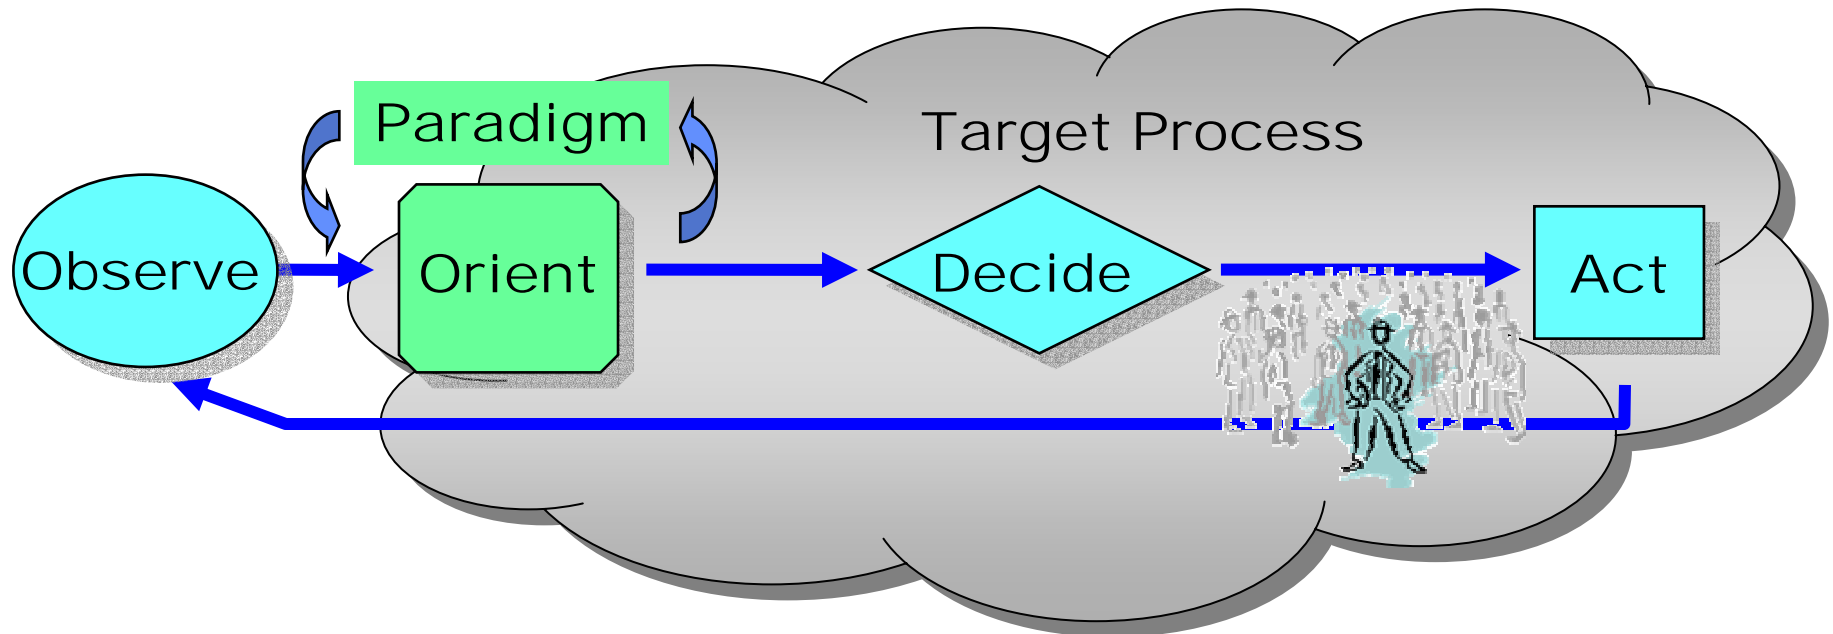

Stakeholder defines the Integration Defect “bin” (what baseline, who’s responsible, what’s happening, who’s defect, where’s it going, what priority)

Date

## Credible, Accessible, Flexible and Finger-tip Feel

# Orient

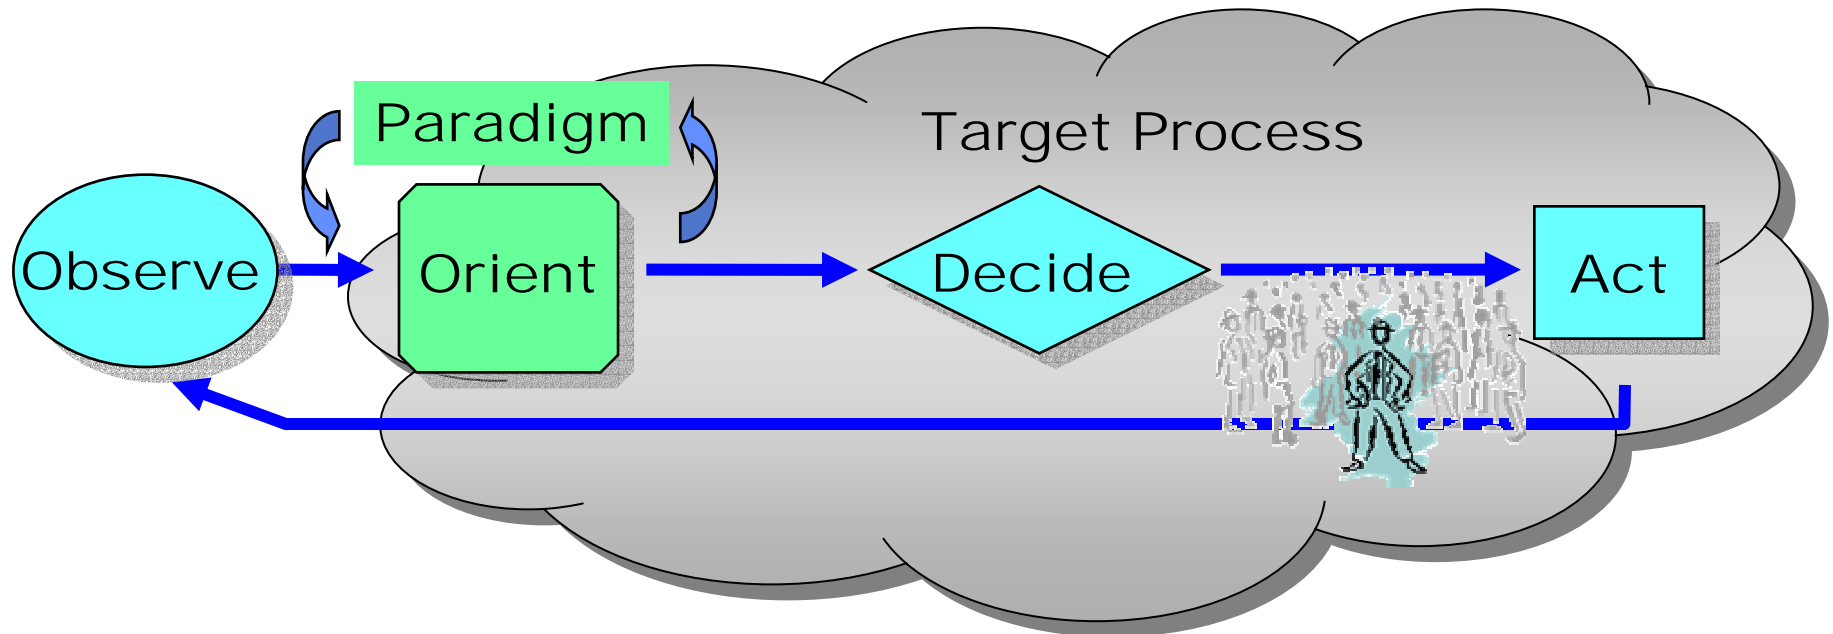

## Orient to Measures and Environment

- Orient the Stakeholders
- Gain Leverage using Perspectives

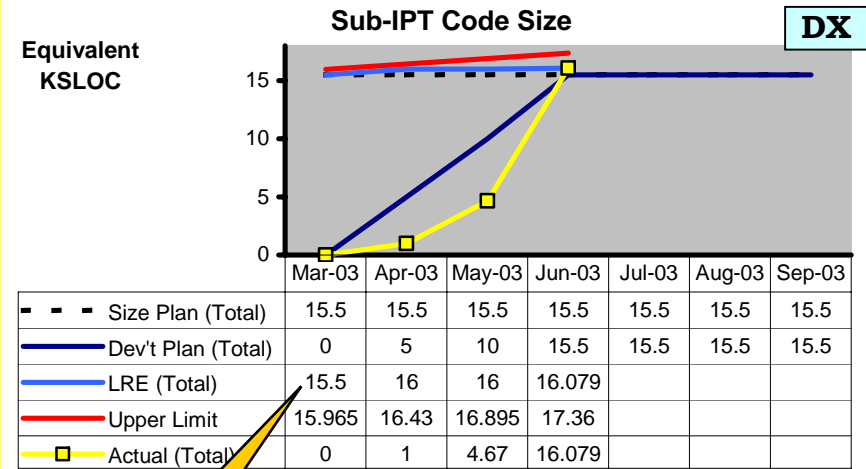

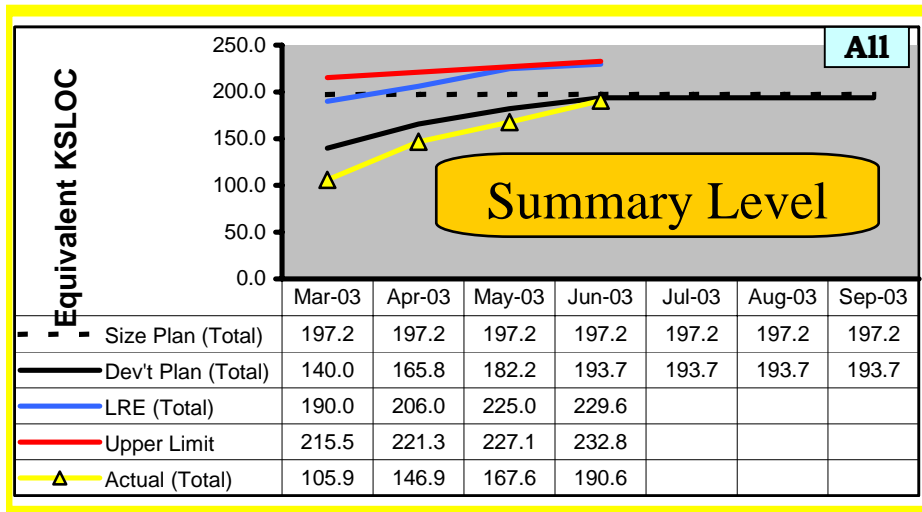

# Orient (Stakeholders)

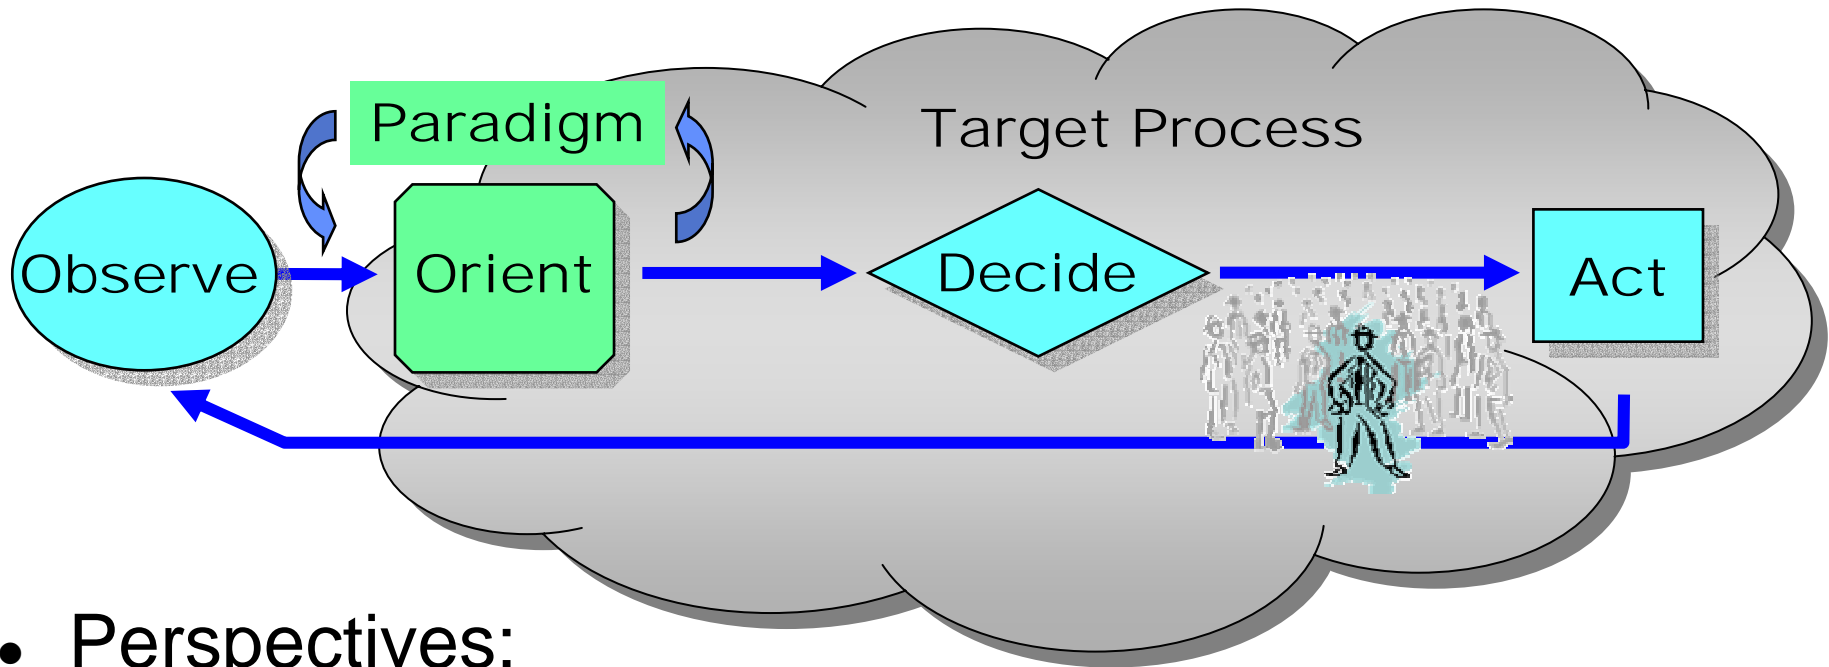

- Understand the Stakeholder Paradigm:
  - May pull or push-back
  - May need adjustment
- Brief with Charts that support Decision-Making

# Orient (Example Code Size Charts)

**Goal: Complete, Consistent, Insightful, No Frills**

# Orient (Leverage)

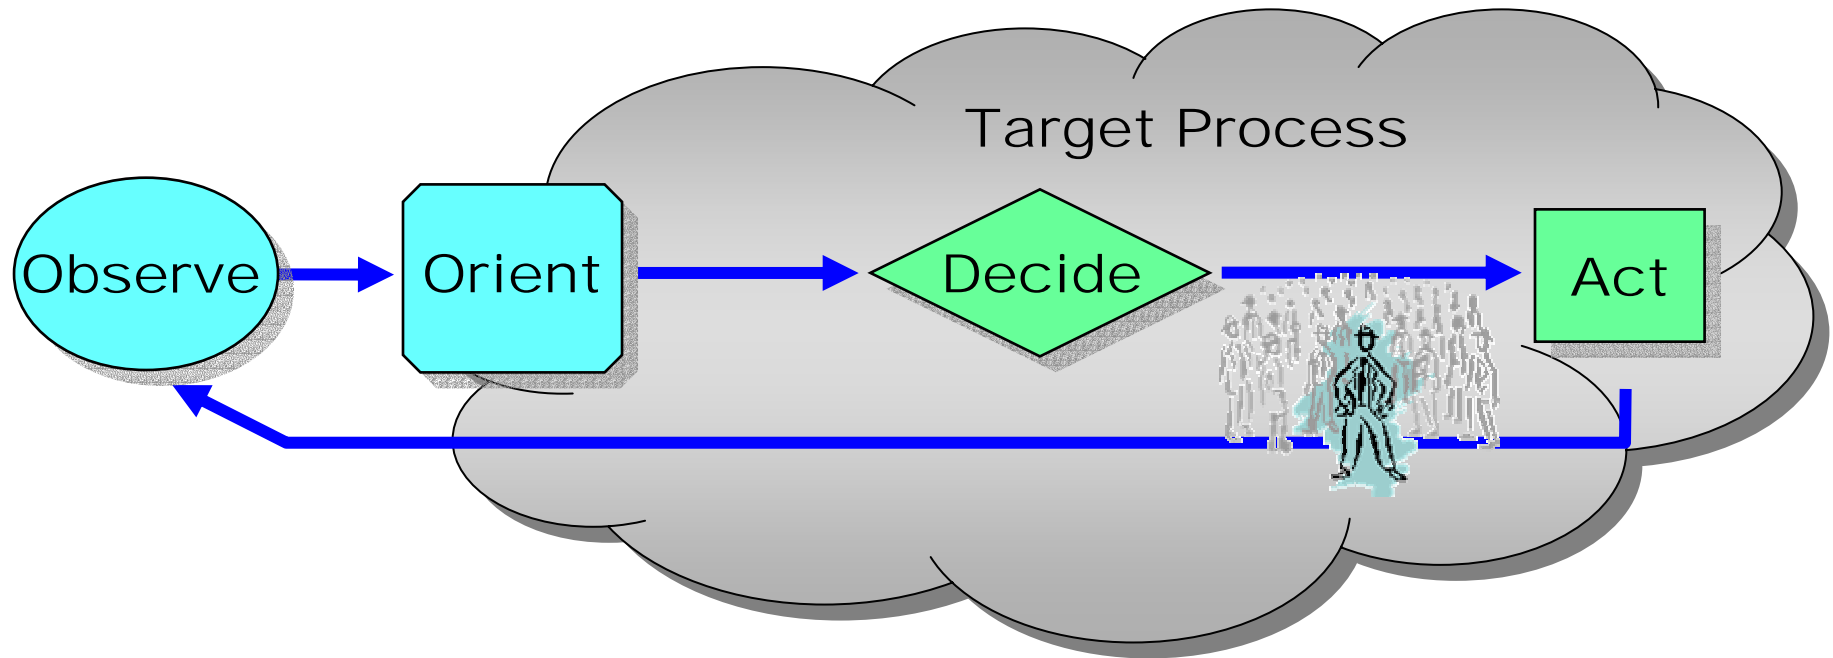

- Perspectives:

- Cost
- Competition
- Customer
- Responsibility

- Tools are critical

# Decide & Act

## Stakeholders Decide and Act

- Avoid delayed decisions
- Proactively support decision/action

# Agenda

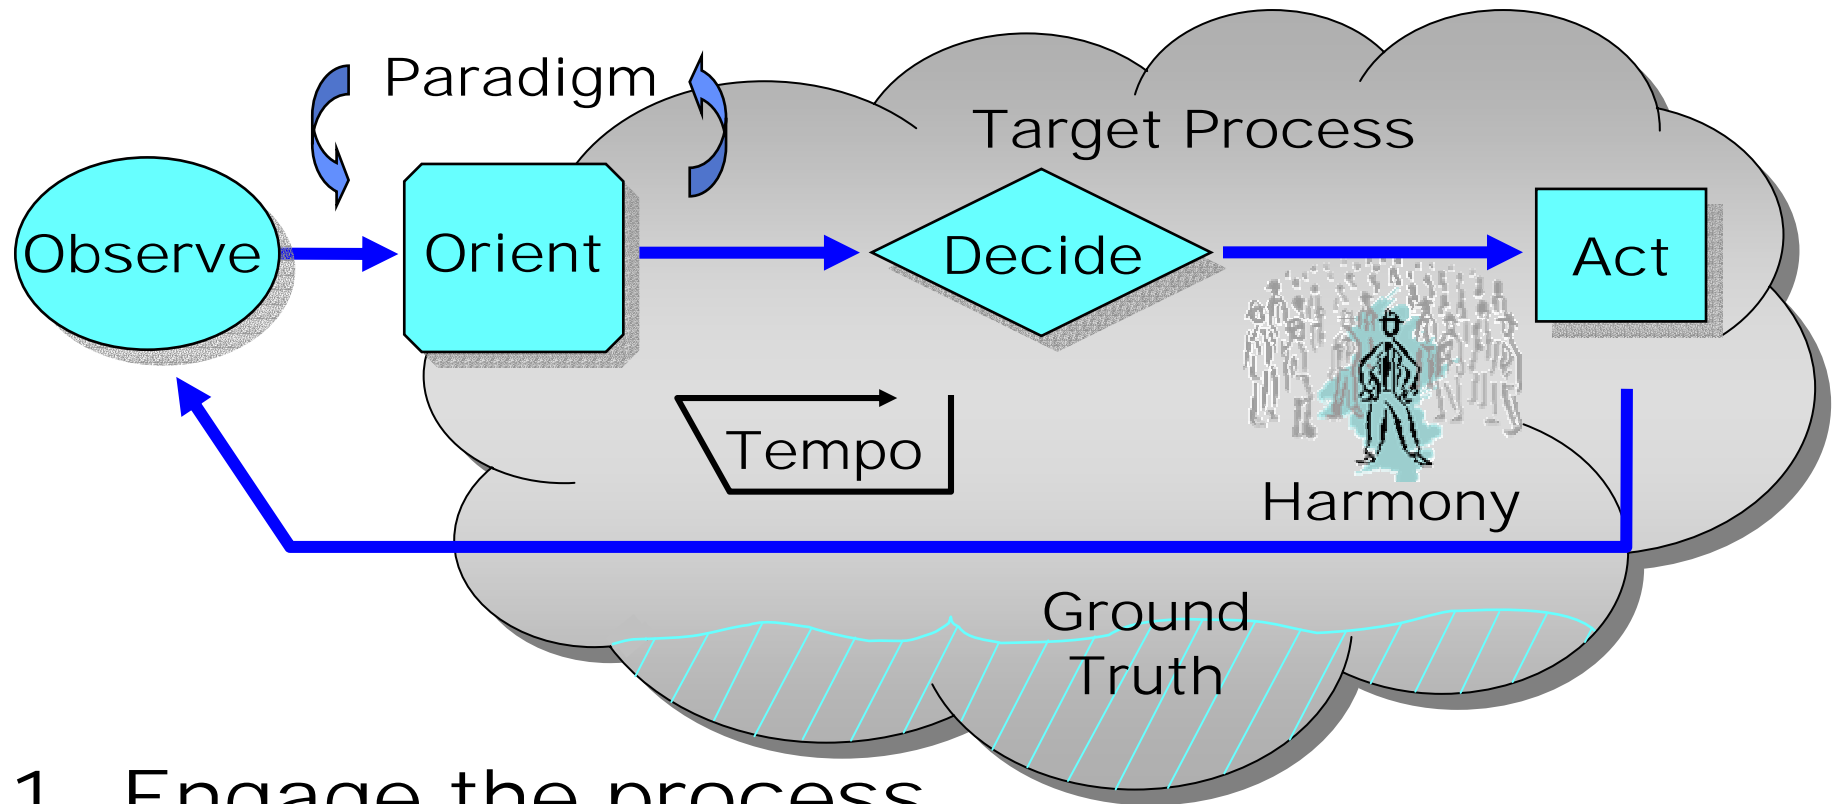

**John Boyd's OODA Loop**

**Rationale for its Use in MA**

**The OODA Loop for MA**

**Summary**

# Measure Like a Fighter Pilot

1. Engage the process
2. Drive corrective action
3. Enjoy the ride!

# Back-Up Material

# References for John Boyd
