

# ***Practical Software Measurement***

***A guide to objective program insight***

## ***Systems Engineering Measurement Workshop***

***July 23, 1997***

***Joint Logistics Commanders  
Joint Group on Systems Engineering***

***Office of the Under Secretary of Defense  
Acquisition and Technology***

## ***Workshop Agenda***

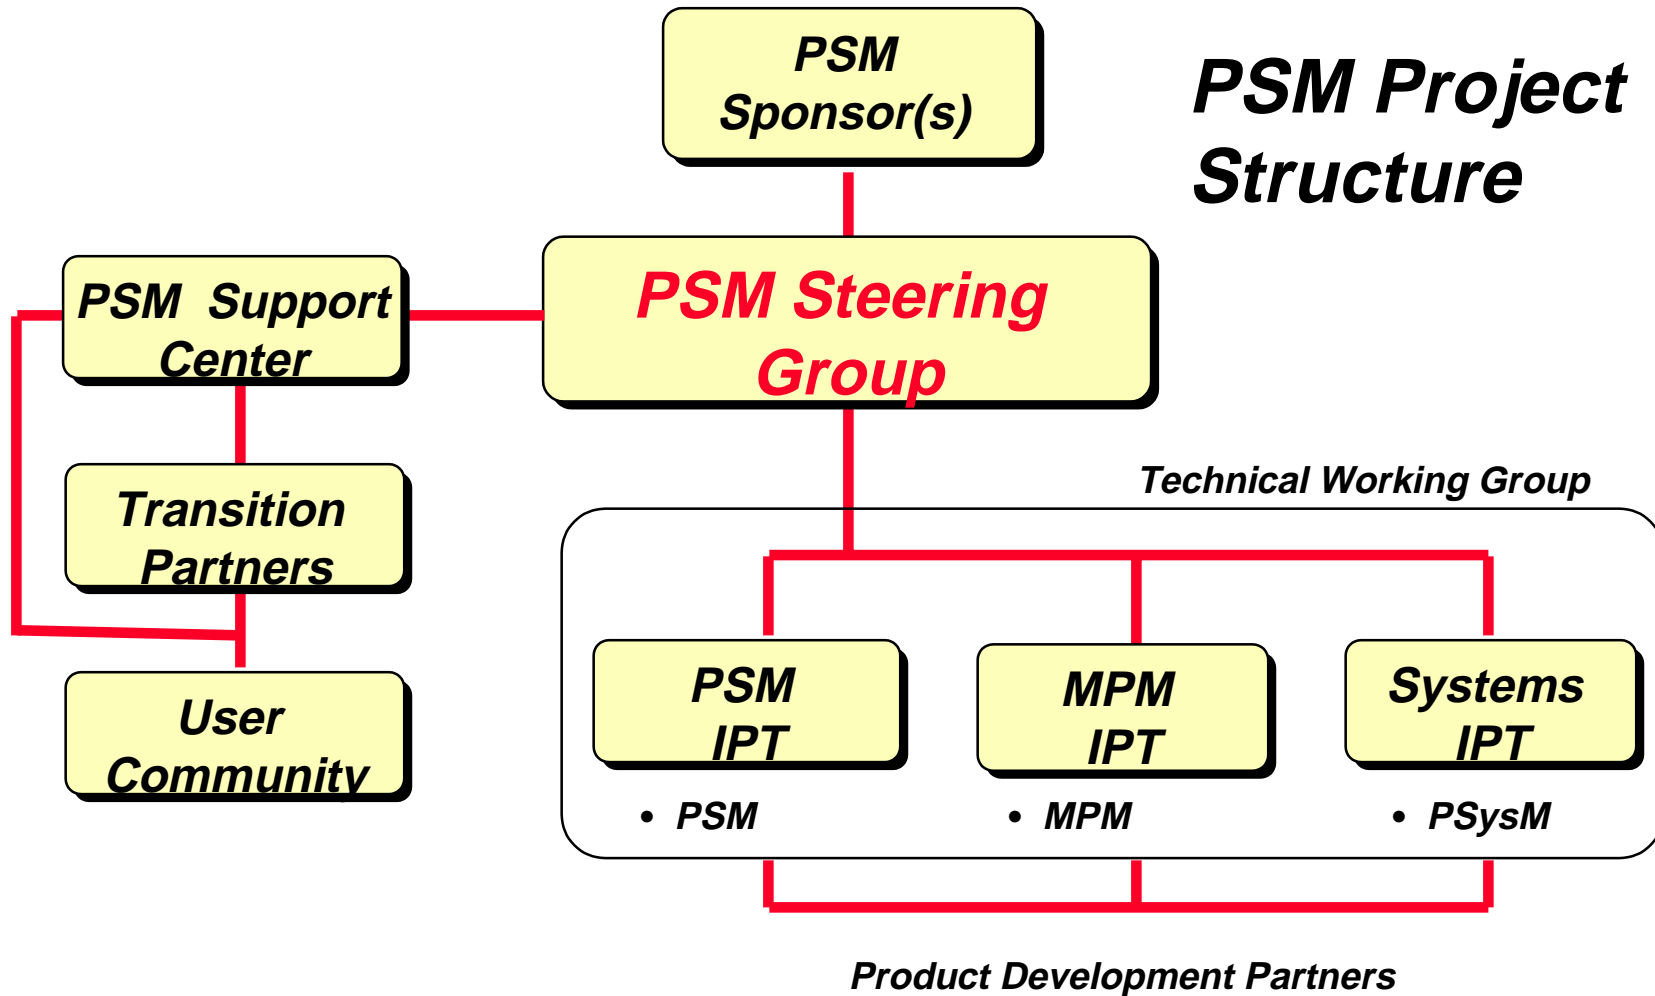

- ***8:30 - 09:15***      ***Review Current PSystem Project Background and Goals***
- ***09:15 - 10:00***      ***Comparison of SW and Systems Measurement***
- ***10:00 - 10:30***      ***Break***
- ***10:30 - 11:00***      ***Links Between SW and Systems Measurement***
- ***10:30 - 12:00***      ***Initial Topics for PSystem***
- ***12:00 - 1:00***      ***Lunch***
- ***1:00 - 3:00***      ***Approach for PSystem Development***
- ***3:00 - 7:00***      ***Free Time***
- ***7:00 - 9:00***      ***Prepare Summary Briefing***

# **Overview of Background** **and Goals**

# ***Practical Systems Measurement***

- ***Objective - Joint INCOSE-PSM Systems Engineering Measurement Products***
- ***SE Products Based on Existing PSM Approach - Structure***
- ***Foundation - PSM Derived Measurement Process With Specific SE Issues/Measures***
- ***Link Systems and Software Analysis***
- ***Joint Development - Implementation Team***
- ***Phased Development Plan***

# **PSM Project Structure**

## ***PSM Measurement Initiatives***

- ***PSM Version 3.0 - Estimation and Analysis***
- ***Software Product Engineering Measurement***
- ***Software Process Improvement Measurement***
- ***Systems Engineering Measurement***
- ***Commercial Software Engineering Standards***
- ***Organizational Performance Measurement***
- ***“Cross-Program” Software Measurement***

# **Benefits of Collaboration**

- **Benefits**

- **Reduces effort and development of materials, training, etc.**
- **Standardizes across greater part of the engineering community**
- **Unified approach will hold more credibility**
- **Larger audience of interest**
- **More likely to be implemented by DoD customers**
- **Compatible and extensible process for whole system and business**

# **INCOSE Metrics Working Group (MWG)**

## **Charter and Scope**

### **Charter:**

- ***Promote shared understanding and advancement of systems engineering metrics, measurement practices, measurement tools/support, and the overall measurement process.***
- ***Scope:***
- ***Measurement addressing:***
  - *Entire system (software, hardware, people, interfaces)*
  - *Entire life cycle (concept through disposal)*
  - *Product, process, and project*

## **Measurement and Systems Engineering**

- *Measurement underlies all levels above level 0 in the SE-CMM*  
*“You cannot control what you can’t measure” Tom DeMarco*
- *Measurement provides the insight and feedback to identify what needs improvement and determine whether the improvement actions were effective*  
*“Measurements ... should primarily be used to help us better understand and adjust our practices.” Bill Hetzel*
- *Measurement needs to be applied to all aspects of Systems Engineering*
  - *Cost*
  - *Schedule*
  - *Quality*
  - *Functionality*  
*“If you measure speed without also measuring quality, you can end up with a lot of junk in a hurry.” Bill Smith*  
*“The number one factor common to companies scoring high in quality was that they were quantitative and had instituted measurement programs.” Dr. Curtis Reimann*

## Capability **Measurement and the SE-CMM**

Requirements  
for  
Measurement

③ Is the process working?

- Data collected from process used to manage process
  - real time feedback of project insight
- Organization standard measurement process-project tailoring
- Measures chosen/added to address project issues
- Identification and prioritization of improvement opportunities based on measures

② Is the project on track?

- Establish historic/experience database
- Plan project using measurement
- Track project progress
- Analyze variances of plan vs. actual

①

- Ad Hoc, informal measurement for planning and tracking

④

- Repeatable and consistent across the organization
- Focus on Project and Process
- Repeatable and consistent at Project Level
- Focus on Project Measures
- Applied inconsistently at project level
- Not applied

## ***Workshop Objectives***

- ***Identify Initial User Requirements To be Addressed in PSystem***
- ***Assess Current Plans for PSystem Guidance and Products - Identify Realistic Schedule and Content for Planned Product Versions***
- ***Establish Basis for Joint INCOSE - PSM Approach to Systems Engineering Measurement***
- ***Establish PSystem Project Plan***

## ***Intended Audience***

- ***System Engineering Project and Technical Managers***
- ***PSM Technical Working Group Members***
- ***INCOSE Metrics Working Group Members***
- ***PSM Users with System Responsibilities***

## ***Intended Output***

- ***Recommendations for Scope and Content of PSysM Guidance and Products***
- ***Comments on the Proposed Approach to Development of PSysM***
- ***Recommendations for Initial Measurement Topics to be Addressed***
- ***Establishment of PSysM Project Plan***

# **Comparison of SW and** **Systems Measurement**

## ***Project Objectives***

<b><i>PSM</i></b>	<b><i>PSysM</i></b>
<ul style="list-style-type: none"><li>• <b><i>Help Program Managers Meet Software Cost, Schedule, and Technical Objectives</i></b></li><li>• <b><i>Provide a Basis for Objective Communication and Informed Decision Making</i></b></li><li>• <b><i>Establish a Foundation for Executive Level Performance Measurement</i></b></li></ul>	

# Software Management Objectives

## Program Management

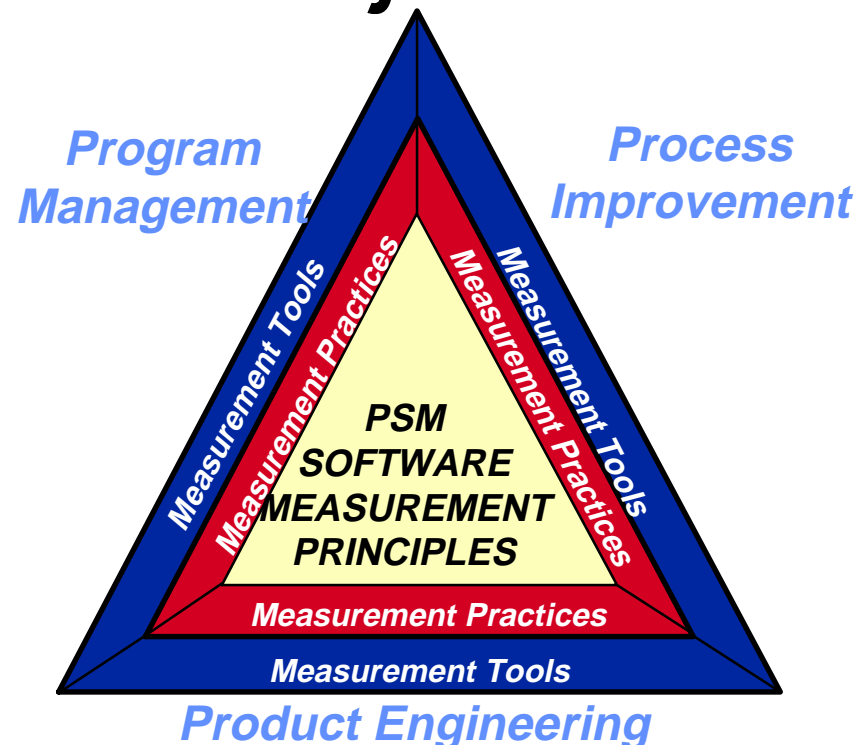

**Meet program commitments  
In terms of delivered software  
capability, cost, schedule, and  
quality**

## Process Improvement

**Make improvements in the  
software development and  
acquisition processes to meet  
defined technical and business  
objectives**

## Product Engineering

**Ensure customer product  
acceptance and satisfaction**

**What Are The System  
Management Objectives?**

# *System Management Objectives*

## ***Initiative Scope***

<b><i>PSM</i></b>	<b><i>PSysM</i></b>
<ul style="list-style-type: none"><li>• <b><i>DoD SW Measurement Needs</i></b></li><li>• <b><i>Target Audience is DoD Program Mgr and Development Team</i></b></li><li>• <b><i>AIS, C3I, and Weapon Systems Programs</i></b></li><li>• <b><i>New and Existing Program Implementations</i></b></li><li>• <b><i>Life Cycle Application - All DoD Programs, All Phases</i></b></li><li>• <b><i>Single SW Program Analysis</i></b></li><li>• <b><i>Fundamental Practices - “How To” Guidance</i></b></li></ul>	

# Key Concepts

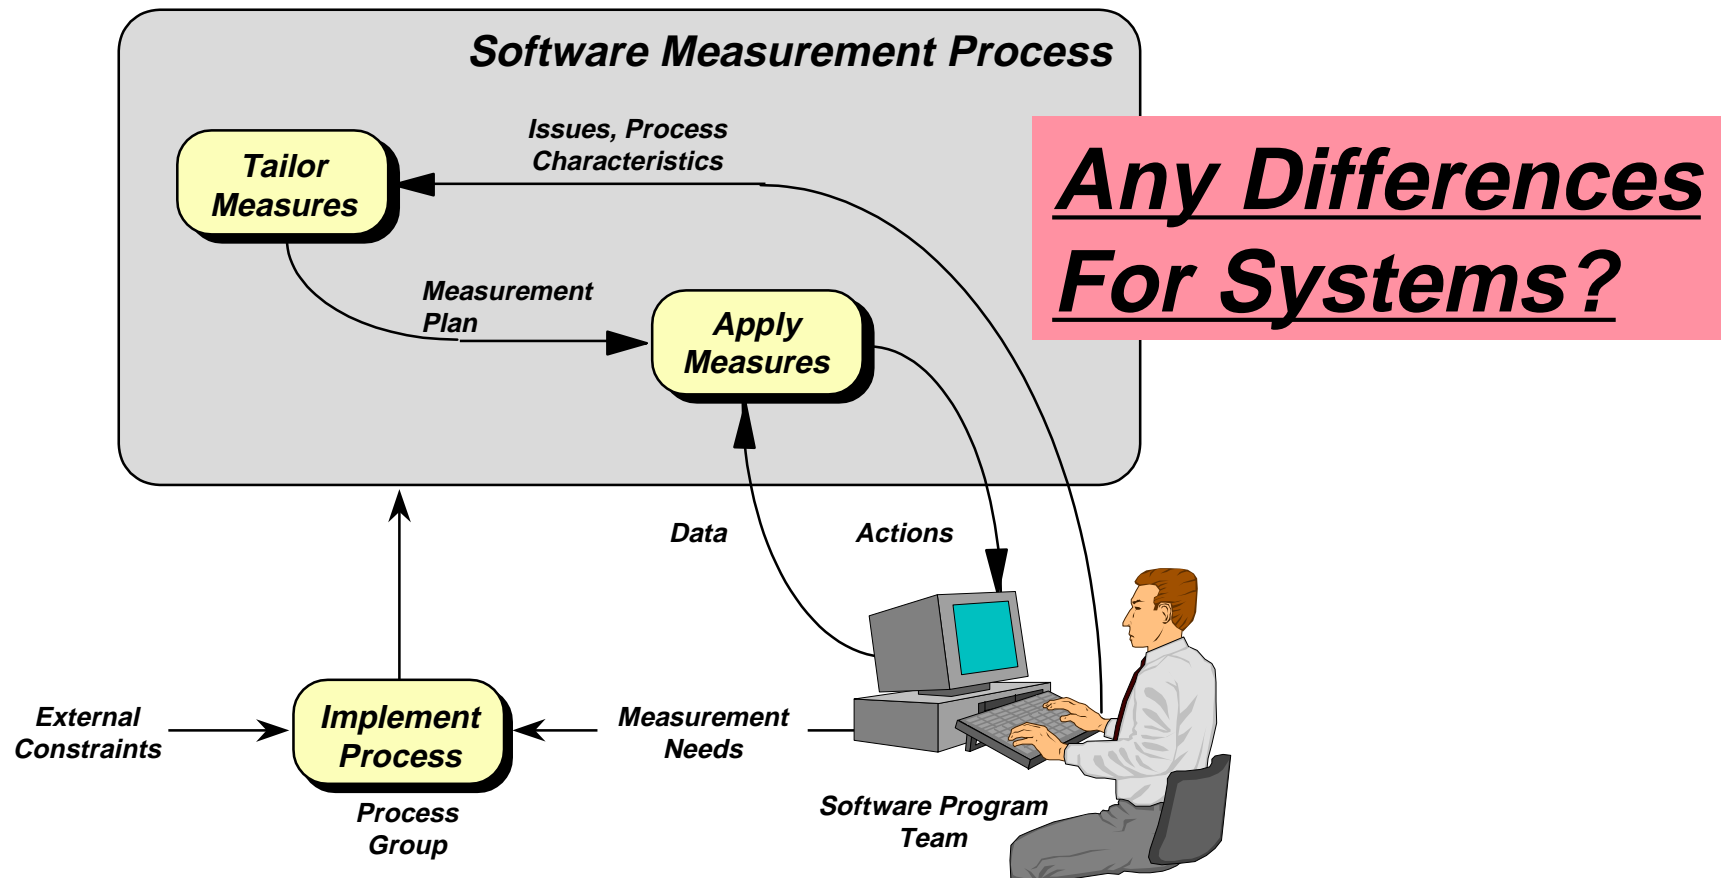

<b>PSM</b>	<b>PSysM</b>
<ul style="list-style-type: none"><li> <b>Views Measurement as a Process, not a Pre-Defined List of Measures, Graphs, or Reports</b></li><li> <b>Defines a Systematic Method for Selecting Appropriate Measures that address program specific issues</b></li><li> <b>Defines a Systematic Method for Analyzing Data incorporating the use of independent analysis to Assess Issues/Risks</b></li><li> <b>Effective Program-Level Measurement is a Prerequisite for Enterprise and Process Measurement</b></li></ul>	

## ***Integrated Software Management***

**Any Differences**  
**For Systems?**

# Software Measurement Activities

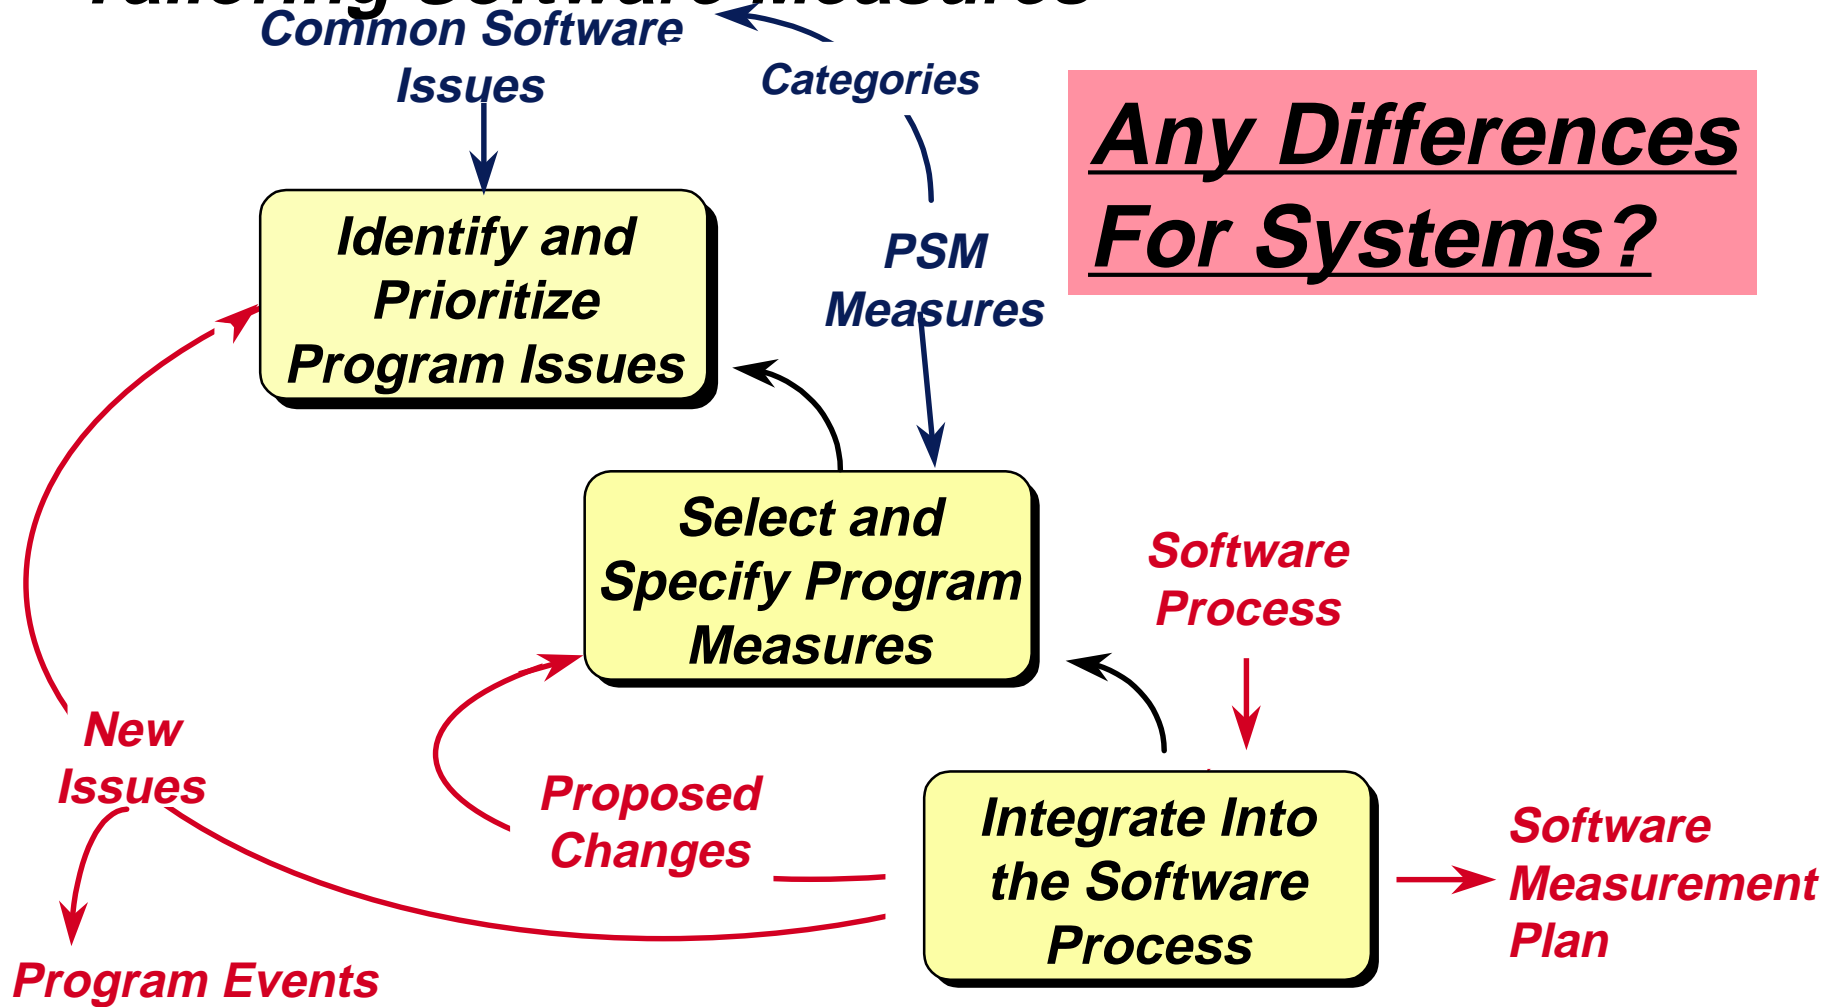

## **Measurement Principles**

<b>PSM</b>	<b>PSysM</b>
<ul style="list-style-type: none"><li>• <b>Program Issues and Objectives Drive the Measurement Requirements</b></li><li>• <b>The Developer's Process Defines How the Software is Actually Measured</b></li><li>• <b>Collect and Analyze Data at a Level of Detail Sufficient to Identify and Isolate Software Problems</b></li><li>• <b>Implement an Independent Analysis Capability</b></li><li>• <b>Use a Structured Analysis Process to Trace the Measures to the Decisions</b></li></ul>	

## ***Measurement Principles***

<b><i>PSM</i></b>	<b><i>PSysM</i></b>
<ul style="list-style-type: none"><li><b><i>• Interpret the Measurement Results In the Context of Other Program Information</i></b></li><li><b><i>• Integrate Software Measurement Into the Program Management Process Throughout the Life-Cycle</i></b></li><li><b><i>• Use the Measurement Process as a Basis for Objective Communications</i></b></li><li><b><i>• Focus Initially on Single Program Analysis</i></b></li></ul>	

# Tailoring Software Measures

## ***Common Issues***

- ***Schedule and Progress***
- ***Resources and Cost***
- ***Growth and Stability***
- ***Product Quality***
- ***Development***
- ***Performance***
- ***Technical Adequacy***

***Do All These Issues  
Apply For Systems?***

***Any Additional  
Issues For  
Systems?***

## **Measurement Categories**

- **Milestone Performance**
- **Work Unit Progress**
- **Schedule Performance**
- **Incremental Capability**
- **Effort Profile**
- **Staff Profile**
- **Cost Performance**
- **Environment Availability**
- **Technology Impacts**
- **Product Size and Stability**
- **Functional Size and Stability**
- **Target Computer Resource Utilization**
- **Defect Profile**
- **Complexity**
- **Process Maturity**
- **Productivity**
- **Rework**

**Do All These Categories**  
**Apply For Systems? Any Others?**

## ***Measures***

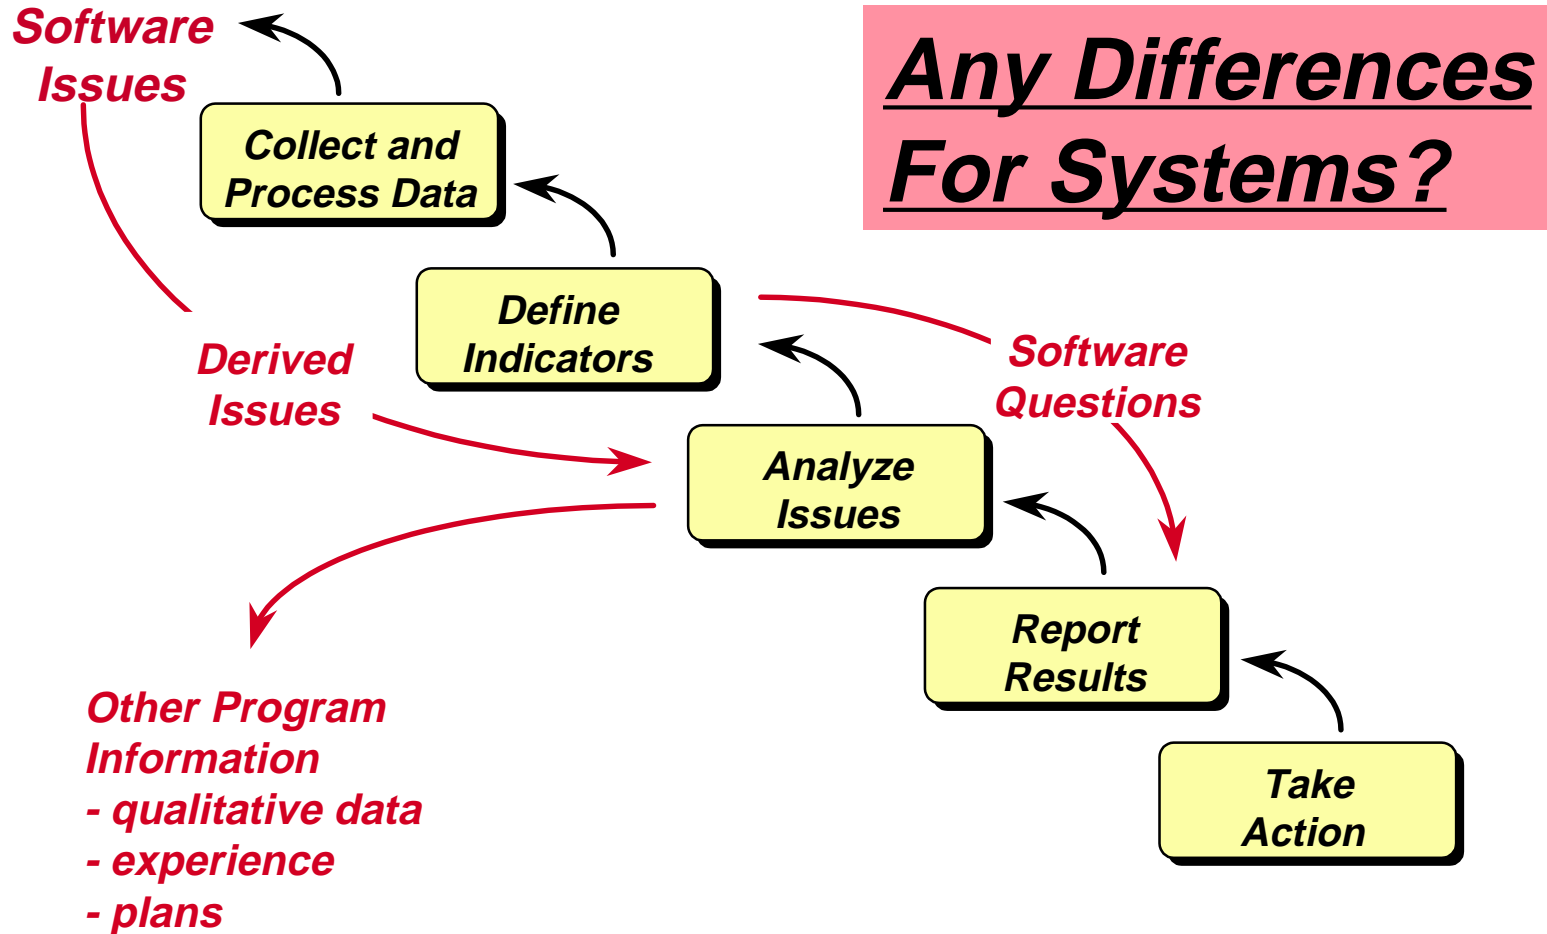

***How Many Of The PSM Measures  
Apply To Systems?***

## **Measurement Plan**

### **Any Differences For Systems?**

- **Issues and Selected Measures**
- **Measurement Specifications and Definitions**
- **Data Sources**
- **Measurement Levels and Aggregation Structures**
- **Frequency of Data Collection**
- **Methods of Data Delivery**
- **Lines of Communication and Interfaces**
- **Frequency of Analysis and Reporting**
- **Working Document**

## Applying Software Measures

**Feedback and Control**

**Estimation**

**Performance Analysis**

**Feasibility Analysis**

**Any Differences For Systems?**

**Link Between Software**  
**and Systems**

## ***Brainstorming Session:***

- Using standard brainstorming technique identify necessary links between software systems measurement.
  
- Discuss items identified

# ***Initial Topics For PSystem***

## ***Group Breakout Session:***

- Breakout into small groups.
- Derive list of Top 5 topics that need to be addressed in PSysM. (20 minutes)
  - Include rationale.
  - Prioritize the list.
- Present results. (5 minutes per group)
- Consolidate lists and prioritize. (20 minutes)
  - Use results for version planning.

**Approach For**  
**PSysM Development**

**Same Products Are**  
**Proposed For PSystem**

**PSM**  
**Products**

**Technical**  
**Guidance**

**Measurement**  
**Workstation**

**Training**  
**Courses**

## ***Collaboration Approach***

- ***Build on Current Products***

- PSM provides detailed, proven process
- INCOSE Guidebook provides system metrics and orientation

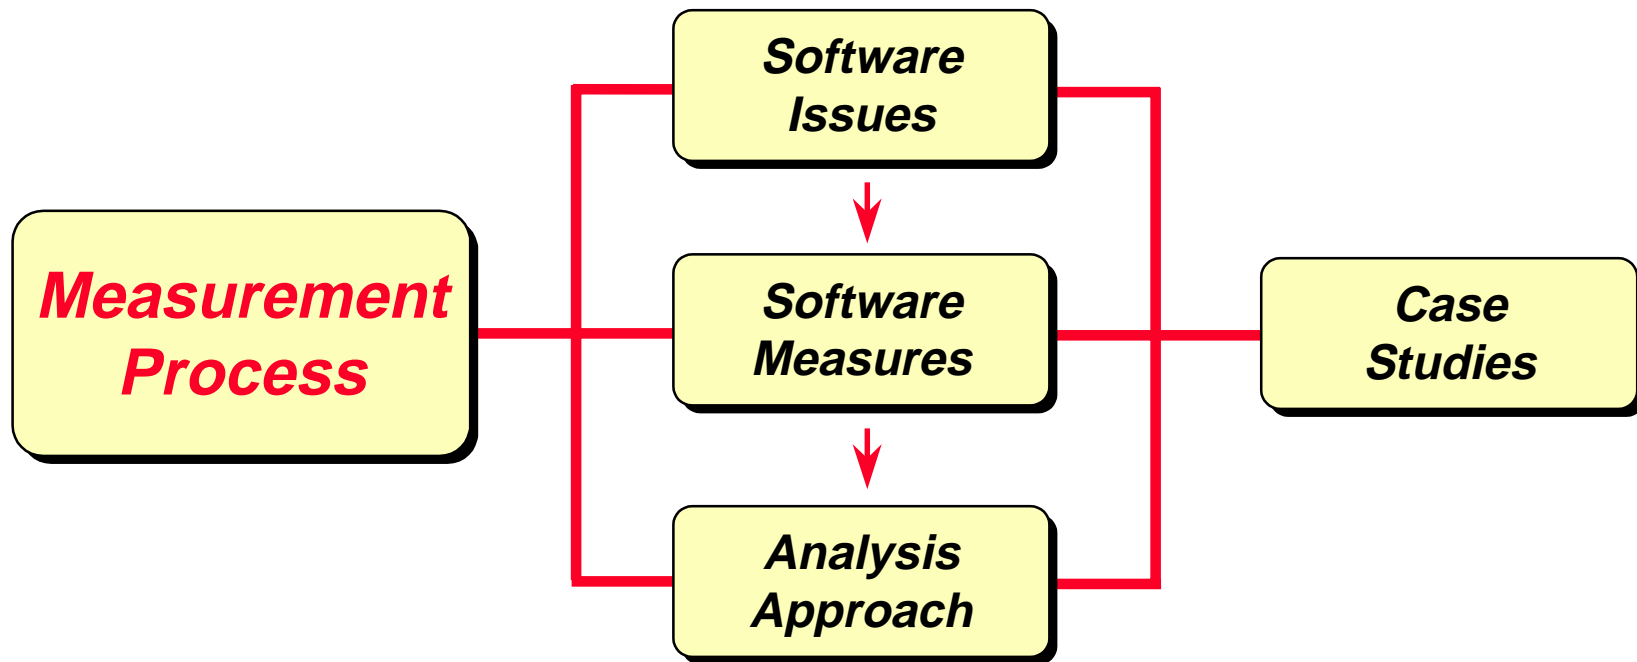

- ***Documentation***

- Use PSM process concepts and documentation directly
- Account for differences between SE and SW
- Use example metrics from current INCOSE guidebook and other sources

- ***Training***

- Reuse much of existing training materials
- Training with same constraints as current PSM trainers
  - » Trainers go through Train-The-Trainers course to be qualified
  - » Course materials controlled - only approved course materials used
  - » Always taught consistently

# ***PSM Guidance Structure***

## ***Proposed Tasks & Schedule***

***Goal: Establish Realistic Schedule for PSystem  
Product Development***

***Proposed: See Next Chart***

***Considerations:***

- ***Results of Product Discussion***
- ***Priorities and Version Content***

## ***Proposed Tasks & Schedule***

### ***Development Task***

### ***Scheduled Completion***

- ***Project Plan***
- ***Concept Outline***
- ***Detailed Outline***
- ***Draft PSysM Guidebook***
- ***Draft Training***
- ***Promotional Briefings  
and Papers***
- ***Version 1.0 of PSysM  
Guidebook***
- ***Training Course Complete***

## ***PSysM Organization Structure***

- ***PSM Technical Steering Group***
- ***PSM Support Center***
- ***PSysM Writer's Group (WG)***
- ***PSysM Technical Working Group (TWG)***

***How can we optimize effectiveness of this structure? Are roles adequately defined?***

# ***PSysM Organization Structure***

## ***Support Commitments (TBR)***

<b><i>Writer's Group</i></b>	<b><i>Technical Working Group</i></b>	
<ul style="list-style-type: none"><li>• <b><i>Garry Roedler</i></b></li><li>• <b><i>Bill Farr</i></b></li><li>• <b><i>Sharon Rohde</i></b></li><li>• <b><i>Don Gantzer</i></b></li><li>• <b><i>Patrick Antony</i></b></li><li>• <b><i>Chuck Mills</i></b></li></ul>	<ul style="list-style-type: none"><li>• <b><i>Garry Roedler</i></b></li><li>• <b><i>Bill Farr</i></b></li><li>• <b><i>Sharon Rohde</i></b></li><li>• <b><i>Don Gantzer</i></b></li><li>• <b><i>Patrick Antony</i></b></li><li>• <b><i>Chuck Mills</i></b></li><li>• <b><i>Chris Miller</i></b></li><li>• <b><i>John Gaffney</i></b></li><li>• <b><i>Jeanmarie MacLean</i></b></li><li>• <b><i>Terry Treadwell</i></b></li></ul>	<ul style="list-style-type: none"><li>• <b><i>Dave Card</i></b></li><li>• <b><i>Florence Beckmann</i></b></li><li>• <b><i>Alan Weinberger</i></b></li><li>• <b><i>Dennis Brink</i></b></li></ul>

## **Logistics**

- ***Meeting Frequency***
  - ***WG***
  - ***TWG***
- ***Meeting Location(s)***
- ***Mode of Meetings***
  - ***Traditional***
  - ***Teleconference***
  - ***Video Teleconference***
- ***Means of Communication***
- ***Other***

## ***Proposed Next Steps***

- ***Finalize Project Plan***
- ***Establish Technical Working Group***
- ***Establish Writer's Group***
