### ***Betsy Bailey***

Betsy Bailey has been involved with software measurement for almost 20 years. In 1979 she received her Ph.D. from UC, Berkeley and joined General Electric Company in Arlington, Virginia. While at GE, she managed a research group conducting empirical studies of computer programming. In 1983, she co-founded Software Metrics, Inc. Since that time, she has also been affiliated with the Institute for Defense Analyses as an adjunct staff member.

She has been involved with PSM since its inception and is one of the principle authors of the guidebook. She maintains an active consulting business and is currently working with Barry Boehm and Chris Abts of USC to develop and calibrate COCOTS, a COTS integration cost model, for the FAA.

Her passion is horses (she owns four). She competes actively in dressage at the highest levels. She lives on a 20-acre horse farm outside Washington, DC.
