

Ms. Laura Dwinnell is employed at Litton/PRC and has 12 years of experience in military operations research, information technology analysis, business area analysis, and systems analysis. She has provided analytical and technical support on numerous projects in a variety of functional areas to produce both quantitative and qualitative results. Her primary application areas include military operations studies and analysis, methodologies development, information technology (IT) analysis, enterprise-level policy analysis, requirements analysis, command and control (C2).

Recent assignments include performing DoD-level policy analysis that spans acquisition and IT management to align policy, reduce redundancies, eliminate conflicts and clarify responsibilities. She is also responsible for managing the development of the Readiness Growth Model (RGM) tool, an earned value indicator that assesses software maturity on software development projects. Her specific responsibilities include managing requirements, testing, QA, performing demos and interfacing with the customer across all RGM-related areas.

Ms. Dwinnell is an active member of PRC's Technology Change Management (TCM) Lead Team and participates on the PRC Requirements Management Working Group. She holds a B.A. in Mathematics and an M.S. in Operations Research & Management Science.
