

Guy Mercurio

Mr. Mercurio is currently the Software Measurement Program Manager for the Defense Contract Management Agency (DCMA), Software Center located at Defense Contract Management Division East - Boston, Massachusetts. He is responsible for the development, implementation and maintenance of the Agencies software performance measurement program that focuses on providing objective assessment of associated software development processes and products to Buying Command and Program Offices. Mr. Mercurio is currently the co-lead for the Agency CMM Based Insight initiative that will improve the current process for performing Software Contract Management Services on Supplier software development activities.

Mr. Mercurio has co-authored various Agency process documents such as the Software Performance Maturity Model and the DCMA Software Contract Management Service Process Guidebook, which provides detailed guidance on DCMA Software Contract Management Service policy. Mr. Mercurio also represents the Agency on various activities such as ISO/IEC SC7, Practical Software Measurement Transition Organization and Executive Steering Committee, and OSD Tri-Service Assessment and Independent Expert Performance Reviews initiatives.

Mr. Mercurio has been with DCMC for 10 years. In addition to his current position, he has held several software engineering positions at DCMC Hamilton Standard, DCMC General Dynamics Defense Systems, and General Electric Defense Systems.

Mercurio earned BS in Electrical Engineering from the University of Massachusetts.
